PROJECTS

[Online Stitching Web application ↗](#)
Jan 2025 - Present

Online Stitching is a full-stack web application where customers can upload their body images and custom dress designs to get automated measurements using AI (OpenCV). They can place tailoring orders, make online payments, and track status. Tailors can view orders, download designs, and update order progress. The platform uses React.js, Node.js, MongoDB, Python (Flask + OpenCV), and Razorpay for seamless tailoring service management.

SKILLS

- Python
- CSS
- Database Management System (DBMS)
- Django
- OpenCV
- HTML
- Java
- React
- MongoDB
- Flask
- JavaScript
- PHP
- Node.js
- Express.js
